

Manual Hydraulic Drum Stacker

This hand-operated drum stacker is designed for lifting and moving drums. It features a steel frame, hydraulic lift, and drum clamp for secure handling.

Product Overview

Manual Hydraulic Drum Stacker LFT18

The Hand Manual Drum Stacker LFT18 is a manually operated lifting device engineered for the safe handling and transport of industrial drums. Featuring a robust steel frame and a reliable hand-operated hydraulic lift mechanism, this stacker ensures secure drum clamping and efficient maneuverability. It is an ideal solution for warehouses and factory environments, allowing a single operator to lift, move, and stack drums while minimizing the risk of spills and workplace injuries.
