

Manual Hydraulic Stacker CYPM Series

The CYPM series includes manual hydraulic stackers for transporting and serving as a mobile workstation. Lifting speed is adjustable based on load, and a slow descent control system prevents damage.

Product Overview

Versatile Manual Hydraulic Stacker

The CYPM Series manual hydraulic stacker is engineered for both efficient material transport and use as a mobile workstation. It features a specialized slow descent control system to prevent damage to cargo and vehicles, alongside a safety unloading system that protects against overload. Designed for adaptability, it offers variable lifting speeds depending on load weight, ensuring operational efficiency in diverse warehouse environments.

Performance Metrics

Lifting Performance

18 strokes

Light Load Strokes (to 800mm)

56 strokes

Heavy Load Strokes (to 800mm)

Technical Specifications

Detailed Specifications

Feature	CYPM1000	CYPM1500
Rated Load (kg)	1000	1500
Max Lifting Height (mm)	800	800
Min Fork Height (mm)	85	85
Fork Length (mm)	1140	1100
Fork Width (mm)	520 / 680	520 / 680

Logistics & Shipping

Shipping Information

- Packing quantity per pallet: 4 or 6 units
- Loading quantity (20' container): 120pcs or 96pcs
- Net weight range: 105kg to 125kg

Features

Key Features

Slow descent control, Safety unloading system, Adjustable lifting speed, Mobile workstation capability
