

# Manual Knife Sharpener with Adjustable Angle

This manual knife sharpener features an adjustable angle for customized sharpening. It includes coarse and fine slots to restore and polish knife edges.

## Overview

### Versatile Manual Knife Sharpener

This manual knife sharpener features an innovative adjustable angle system, allowing users to customize the sharpening process between 15 and 25 degrees to suit specific blade requirements. Designed with ergonomics in mind, it combines a beautiful aesthetic with durable construction for long-term use. The two-stage sharpening system ensures that blades are both restored and polished to a professional standard.

## Key Features

### Sharpening System

- Coarse stage using Diamond/Carbon for edge restoration
- Fine stage using Ceramic for polishing and finishing
