Product Overview

Manual Log Splitting Solution

This manual log splitter is a high-strength steel tool engineered for efficient firewood preparation without the need for electricity or gasoline. Designed for safety and portability, it utilizes a simple lever or sliding weight mechanism to generate the force required to split logs. Its compact, durable construction makes it an ideal choice for homeowners, campers, and remote wood-splitting needs.

Technical Specifications

Material	High-strength steel
Power Source	Manual (No electricity or fuel required)
Key Features	Safety Cage, Sliding Weight Mechanism, Steel Splitting Wedge, Portable Design

Usage & Benefits

Best For

- Homeowners
- Camping
- Remote locations
- Cost-effective firewood preparation

Safety Features
