

Manual Metal Shear and Bender Set

Manual cutting tools designed for shearing and bending metal materials. These tools are suitable for workshops and fabrication environments where manual metalworking is required.

Product Overview

Manual Metal Shear and Bender Set

This comprehensive set includes two lever-operated shears designed for robust cutting of sheet metal and bars, alongside a manual metal bending machine. Engineered for precision and durability, the bending unit features adjustable pins and levers to facilitate accurate shaping of metal rods and strips. These tools are ideal for workshops and fabrication environments requiring reliable, manual metalworking capabilities.

Technical Details

Included Tools

- Lever-operated metal shear (x2)
- Manual metal bending machine (x1)

Key Features

Lever-operated, Adjustable pins, Manual operation, Robust construction

Applications

Suitable Materials

- Sheet metal
- Metal bars
- Metal rods
- Metal strips

Best For

Workshops • Fabrication Environments • Manual Metalworking
