

Manual Multi-Functional Fabrication Machine

This manual multi-functional machine is designed for various applications. It is engineered for precision and ease of use, offering a range of functionalities for cutting, bending, and shaping materials.

Product Overview

Versatile Fabrication Solution

The SHY-120H is a robust manual multi-functional machine engineered for precision cutting, bending, and punching of metal sheets. Designed for professional fabrication, it offers reliable manual control over material processing tasks. With a compact footprint and high force output, it serves as an essential, cost-effective tool for various industrial workshop applications.

Technical Specifications

Punching Force

15 T

Punching Force

Maximum Material Thickness	10 mm
Maximum Sheet Width	120 mm
Approximate Weight	45 Kg

Capabilities

Bending Specifications	0-90 degree bending capacity on sheets up to 10mm thick and 120mm wide.
Cutting Specifications	Precision cutting for material widths ranging from 10mm to 120mm with 10mm thickness.

Accessories

Included Punch Dies

- 3/8" (10.5mm)
- 1/2" (13.8mm)
- 5/8" (17mm)
- 3/4" (20.5mm)
