

Manual Pallet Jack 2500kg Capacity

This hand pallet truck is a manually operated material handling equipment designed for lifting and transporting pallets. Its robust construction ensures reliable performance in demanding industrial environments.

Overview

Manual Pallet Jack

This manually operated material handling equipment is designed for efficient lifting and transporting of pallets in industrial environments. It features a robust hydraulic system for reliable raising and lowering, controlled by an ergonomic hand lever. Built for durability and maneuverability, it is an essential tool for warehouses, factories, and distribution centers.

Technical Specifications

Load Capacity

2500 kg
Capacity

Operation

Manual hydraulic

Features

Key Features

Hydraulic lifting system, Ergonomic handle, Safety lowering control, Durable wheels

Applications

Suitable Environments

- Warehouses
- Factories
- Distribution centers
