Product Overview

Manual Hydraulic Stacker

This manual hydraulic stacker is a versatile, non-powered solution designed for efficient loading, unloading, and stacking in various industrial environments. Featuring a compact single door frame structure, it offers a small turning radius and flexible transportation capabilities, making it ideal for confined spaces like workshops and warehouses. Its manual operation makes it a safe, non-pollution alternative for sites with strict fire and explosion protection requirements.

Key Features

Core Advantages

- Non-pollution and non-powered operation
- Compact single door frame design
- Small turning radius for tight spaces
- Suitable for fire and explosion-prone environments

Safety Features

Load backrest extension, Reliable braking system, Safety cage

Technical Specifications

Construction Material	Robust steel frame
Lift Mechanism	Manual hydraulic
Fork Type	Adjustable

Application Suitability

Industries Served

Warehousing • Logistics • Printing • Paper Making • Machinery Manufacturing • Agriculture

Specialized Environments

- Printing workshops
- Oil depots
- Docks
- Warehouses with fire/explosion protection requirements
