Product Overview

Material Handling Solution

This manual pallet stacker is a versatile, hand-powered tool designed for efficient lifting, lowering, and steering of palletized goods. It is an essential piece of warehouse equipment, particularly effective for organizing pallets in tight spaces or narrow aisles such as truck trailers. Built with a sturdy steel frame and a smooth hydraulic lifting system, it offers a cost-effective and ergonomic alternative to powered machinery for light-to-medium duty operations.

Technical Specifications

Operation	Manual (Hand-powered)
Lifting System	Hydraulic system with hand-operated pump
Construction	Sturdy steel frame

Key Features

Usability

- Ergonomic handle for comfortable operation
- Minimized turning radius
- Adjustable forks for various pallet sizes
- Easy maneuverability in confined spaces

Safety Features

Foot-operated parking brake, Overload protection, Controlled lowering valve
