

Manual Paver Block Splitter - 330mm Blade

This manual paver block splitter has a 330mm blade length and a maximum split opening of 140mm. Its spring-supported platform and two wheels provide smooth splitting action and high maneuverability.

Product Overview

Professional Paver Block Splitter

This manual paver block splitter is a robust tool engineered for precision and efficiency in landscaping and construction tasks. It features a hardened blade for extended durability and a spring-supported platform that ensures smooth operation. Designed for high maneuverability, the unit includes integrated wheels for easy transport across job sites, making it an ideal solution for professional block splitting.
