## Overview

### Professional Manual Paver Block Splitter

This high-performance manual paver block splitter is engineered for precision and efficiency in landscaping and construction projects. Featuring a robust steel frame and a hardened blade, it delivers clean splits with minimal physical effort. Designed with high maneuverability in mind, the unit includes two wheels and a spring-supported platform to ensure stability and ease of use on job sites.

## Technical Specifications

Detailed view of the functional components, including the telescopic lever, screw adjuster, and blade assembly.

Cutting Length	250 mm
Cutting Height Range	25-85 mm
Total Weight	20 kg

## Key Features

### Design Highlights

- Telescopic lever for increased leverage
- Screw adjuster for blade height
- Spring-supported platform
- Hardened blade for durability
- Two-wheel design for maneuverability

### Operational Benefits

Smooth Splitting Action • High Maneuverability • Stable Operation • Reduced Material Waste
