

Manual Paver Block Splitter with 330mm Blade

This manual paver block splitter features a 330mm blade for efficient cutting. It has a spring-supported platform and two wheels for maneuverability.

Overview

Precision Manual Block Splitting

This heavy-duty manual paver block splitter is engineered for high-precision cutting of paving stones, bricks, and blocks on construction sites. Featuring a hardened blade and a spring-supported platform, it ensures smooth, clean cuts with minimal effort. Designed for portability, the unit includes a wheeled base and a stable handle, making it an essential, reliable tool for professional landscaping and paving projects.

Performance

Cutting Capacity

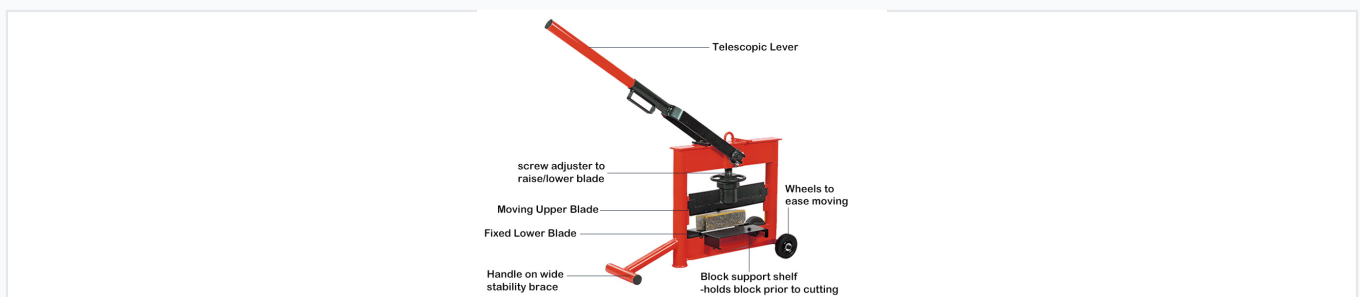

330 mm
Cutting Length

140 mm
Max Split Opening

Physical Specifications

- Weight: 41 kg
- Hardened blade for extended operating life
- Spring-supported platform for smooth splitting action

Design & Construction
