Overview

Efficient Manual Pineapple Processing

This manual pineapple peeling machine is designed to streamline fruit preparation in commercial kitchens, catering services, and food processing plants. It features a robust, lever-operated mechanism that removes both the shell and the core in a single, efficient motion. Built for durability and hygiene, the stainless steel construction ensures long-term reliability while maintaining high standards of food safety.

Technical Specifications

Operation Type	Manual
Construction Material	Stainless Steel
Key Features	High Efficiency, Simple Structure, Easy Operation, Zero Power Consumption
