Product Overview

Efficient Plant Management Solution

This manual plant tying tool is designed to significantly streamline the process of securing plants to trellises, stakes, and wires. By integrating a tape dispenser, stapling mechanism, and cutting blade into one hand-operated device, it allows for quick and efficient tying in vineyards, orchards, and gardens. Its ergonomic design reduces labor time and physical strain, making it an essential tool for professional horticultural maintenance.

Technical Specifications

Core Components

- Integrated Tape Dispenser
- Automated Stapling Mechanism
- Built-in Cutting Blade
- Ergonomic Handle

Materials

Durable Metal Frame, High-Impact Plastic Housing

Operation

Manual hand-operated

Applications

Ideal For

Vineyards • Orchards • Gardens • Plant Training

Compatible Supports

- Trellises
- Stakes
- Support Wires
