

Manual Pressure Test Pump

This hand test pump is designed for pressure testing of water or oil pipelines and systems. It features a durable construction with a red reservoir and a manual lever for generating pressure.

Product Overview

Professional Hydraulic Testing Solution

This manual pressure test pump is engineered for reliable leak detection in heating, oil, air-conditioning, and sprinkler installations. Featuring a robust design with a lubricated plunger and replaceable seals, it ensures long-term durability and ease of maintenance. The integrated needle valves allow for efficient, continuous operation during critical testing procedures.

Technical Specifications

Pressure Range

0 bar

Minimum Pressure

50 bar

Maximum Pressure

Key Features

- High-pressure hose included
- Includes necessary connectors
- Lubricatable pump plunger
- Replaceable seals
- Efficient running needle valves

Suitable Applications

Heating Systems, Oil Installations, Air-conditioning, Sprinkler Systems
