

Manual Push Seeder

This manual planting machine is designed for efficient and precise seed sowing. It features a durable frame with an adjustable handle, a seed hopper, a planting wheel, and a rear roller for optimal seed-to-soil contact.

Product Overview

Efficient Manual Planting Solution

The Hand Push Seeder is a versatile manual planting machine designed to streamline sowing and fertilizing tasks. Built for adaptability, it features adjustable settings for seed spacing and mouth numbers, allowing for precision in various planting conditions. Its robust design is suitable for diverse topographies, including fields and hills, making it an essential tool for small-scale agricultural operations.

Technical Specifications
