

# Manual Sheet Metal Bending Brake

This manual sheet metal bending brake is designed for bending sheet metal into various shapes. It features a clamping mechanism and a bending beam, making it suitable for small to medium-sized fabrication shops.

## Product Overview

### Manual Sheet Metal Bending Brake

This manual sheet metal bending brake is a robust tool engineered for precision fabrication in small to medium-sized workshops. Featuring a sturdy, industrial-grade blue frame and an integrated clamping mechanism, it allows operators to bend metal sheets into diverse, complex shapes with ease. The bending beam is equipped with high-visibility black and yellow safety stripes to ensure operational awareness, making it a reliable addition to any professional fabrication environment.

## Technical Specifications

### Target Use

- Small fabrication shops
- Medium-sized fabrication facilities
- Sheet metal bending

Operation Type	Manual
Safety Features	High-visibility stripes, Manual clamping system, Warning labels
