

Manual Stamping Tool

This precision-engineered stamping tool is designed for marking and indenting materials. It features a hexagonal body for a secure grip and a hardened steel tip for durability and accurate impressions.

Product Overview

Precision Manual Stamping Tool

This manual stamping tool is precision-engineered for professional marking and indenting across various hard surfaces. Designed for metalworking and jewelry manufacturing, it features a robust, hardened steel tip that ensures consistent and durable impressions. Its hexagonal body construction provides an ergonomic and secure grip to maintain accuracy during high-precision tasks.

Technical Specifications

Included Markings

- A
- B
- C

Body Design	Hexagonal
Material	Hardened Steel

Application

Primary Applications

Metalworking • Jewelry Making • Material Indenting
