

Manual Steel Cable Winch

This manual winch features a durable steel cable and robust gear mechanism. It is designed for reliable performance in pulling and lifting applications, with a safety hook for secure attachment.

Product Overview

Reliable Manual Operation

This manual steel cable winch is engineered for heavy-duty pulling and lifting applications across workshops, boat trailers, and general load handling. Featuring a robust A3 steel construction with a galvanized finish, it ensures durability and resistance to environmental wear. The system includes a precise 4:1 gear ratio for smooth, controlled operation, providing professional-grade reliability for your lifting needs.
