

# Manual Steel Plate and Bar Shears

Manually operated shears designed for cutting plate and bar steel. It features a lever-action mechanism for increased cutting force, a sturdy base for stability, and a long handle for ease of use.

## Product Overview

### Manual Steel Plate and Bar Shears

These manually operated shears are engineered for precision cutting of plate and bar steel. Featuring a robust lever-action mechanism, the tool maximizes cutting force while maintaining ease of operation for the user. Its sturdy base ensures stability during heavy-duty metalworking tasks, delivering clean and accurate results for various industrial applications.

## Key Features

### Key Features

- Manual lever-action operation
- Designed for steel plate and bar cutting
- High-stability base construction
- Extended handle for increased leverage

## Application

### Suitable Materials

Steel Plate, Steel Bar, Metalwork

## Performance

### Mechanism

Lever-action
