

Manual Suspension Overhead Crane

This manual suspension crane is installed on the plant ceiling, making it suitable for light handling tasks in facilities without power, where speed is not critical. The crane's track is an I-steel fixed to the ceiling, ensuring stable operation with minimal noise and easy manipulation.

Product Overview

Manual Suspension Overhead Crane

This manual suspension overhead crane is an ideal solution for facilities without power access or where high-speed efficiency is not the primary requirement. Designed for installation on the plant ceiling, it utilizes an I-steel track for stable, quiet, and pollution-free operation. It effectively reduces labor intensity in shops, warehouses, and assembly areas, offering a compact and easy-to-manipulate material handling solution.

Operational Characteristics

Recommended Applications

- Warehouses
- Manufacturing Workshops
- Assembly Lines
- Repair Facilities
- Small-scale Material Handling

Key Features

Manual Operation, Stable Performance, Low Noise, Pollution-Free, Compact Design

Technical Details

Installation Method

Ceiling-mounted on I-steel track

Power Requirements

None (Manual)
