

Manual Tile Cutter

This manual tile cutter is designed for accurately cutting ceramic, porcelain, and mosaic tiles. It features a sturdy metal base with a sliding carriage system for smooth scoring and includes a break point for easy tile separation after scoring.

Overview

Professional Manual Tile Cutter

This high-performance manual tile cutter is engineered for precision and durability, making it an essential tool for cutting ceramic, porcelain, and mosaic tiles. Featuring a robust metal base and a smooth sliding carriage system, it ensures consistent scoring and clean, accurate cuts every time. Equipped with a long-lasting tungsten carbide cutting wheel and an integrated break point, this tool simplifies the tile separation process, making it ideal for both professional contractors and serious DIY enthusiasts.

Technical Specifications

Key Features

- Precise scoring carriage
