

Manual Tile Cutter with Plastic Base

This tile cutter is designed for cutting ceramic and porcelain tiles. It features a durable plastic base and a smooth-gliding cutting carriage.

Product Overview

Compact Tile Cutting Solution

The TC110 is a compact and lightweight manual tile cutter specifically designed for ceramic and porcelain tiles. It features a durable plastic base and a smooth-gliding cutting carriage, ensuring ease of use for various tiling tasks. Equipped with a precision scoring wheel and an integrated break-off mechanism, this tool allows for clean and accurate tile separation, making it an ideal choice for small to medium-sized tiling projects.
