

Manual Twist Cultivator with Foam Grip

This twist cultivator is a manual tool for loosening and aerating soil. It features a T-shaped handle with a foam grip and a spiral-shaped auger.

Product Overview

Manual Twist Cultivator

This manual twist cultivator is engineered for efficient soil aeration and loosening, making it an essential tool for gardening and agricultural preparation. Featuring a high-leverage T-shaped handle with comfortable foam grips, it allows for effortless operation when breaking up compacted soil. The helical auger design ensures precise penetration, making it ideal for creating holes for bulbs and seedlings or general soil prep.

Design and Ergonomics

Handle Style	T-shaped ergonomic design
Grip Material	Foam

Construction

Blade Configuration	Helical spiral auger
Material Composition	Metal shaft, Curved metal blades

Applications

Primary Applications

- Soil aeration
- Breaking up compacted soil
- Preparing planting areas
- Creating holes for bulbs and seedlings
