Product Overview

Manual Circuit Control

These manually operated knife switches are engineered for reliable electrical circuit control, serving as essential components for isolating circuits during maintenance or emergency situations. Featuring robust construction with screw terminals, they are designed for secure panel mounting. Available in various configurations and voltage ratings, these switches provide clear visibility of internal operations, making them a versatile choice for diverse electrical applications.

Electrical Ratings

Voltage Compatibility

- 220V
- 250V
- 380V
- 500V
- 600V

Available Amperage

32A, 60A, 100A

Technical Specifications

Pole Configurations

2P • DPDT

Design Features

- Transparent housings
- Indicator lights
- Manual handle operation

Mounting Type

Panel Mount

Connection Type

Screw Terminals
