

Marble Cutting Machine

This marble cutting machine is a specialized power tool for accurately cutting marble, granite, ceramic, and other stone. It features a robust motor providing high cutting performance and an adjustable cutting depth.

Product Overview

Professional Stone Cutting Solution

The JD3600C marble cutting machine is a specialized power tool engineered for the precise and efficient cutting of marble, granite, ceramic tiles, and various stone materials. It features a robust motor capable of high cutting performance and includes an adjustable depth setting to accommodate different material thicknesses. Designed with operator comfort and safety in mind, it incorporates an integrated water cooling system to minimize dust and extend blade longevity.

Technical Specifications

Insulation

Double-insulated

Adjustable Cutting Depth

Yes

Cooling Method

Water cooling system

Key Features

Safety Equipment

- Blade guard
- Double-insulated motor

Ideal For

Stone Fabrication, Tile Installation, Construction
