

Marine Anchor Cable Quick Release Clamp

This clamp is designed for quickly releasing anchor cables in marine applications. It features robust construction and a lever-operated mechanism for controlled and reliable performance.

Overview

High-Performance Marine Anchor Cable Release

This Marine Anchor Cable Quick Release Clamp is designed for reliable performance in demanding maritime environments. Available in stainless steel or casting steel, it features a smooth, polished surface and an elegant yet durable design. The unit is manufactured using advanced CNC machining and ultrasonic cleaning to ensure precision and quality for critical anchoring operations.

Technical Specifications

Manufacturing Facilities

- CNC Center Machining
- CNC Lathes
- Ultrasonic Wave Cleaning

Material	Casting Steel, Stainless Steel, Steel
Surface Treatment	Polished

Compliance & Quality

Classification Society Certifications

CCS • BV • LR • ABS

Product Variants

Available Models

- Dog type cable clench
- Screw type cable releaser
- Simple machine for releasing anchor

Customization	Yes
