

Marine Antenna Rubber Base

This durable rubber base is designed for marine antennas. It provides a secure and weather-proof mounting solution for antennas on boats and other marine vessels.

Product Overview

Marine Antenna Rubber Base

This durable rubber base is engineered specifically for marine antenna mounting, offering a secure and weatherproof solution for boats and vessels. Its flexible, ribbed rubber construction provides superior resistance to harsh marine environments while protecting critical antenna connections from water ingress and mechanical stress. Designed for versatility, this base ensures long-lasting performance and reliable signal stability in demanding maritime conditions.

Physical Properties

Material	Durable Rubber
Color	Black
Design Features	Ribbed Design, Flexible, Weatherproof

Application & Compatibility

Application	Marine Vessels / Boats
Compatibility	Standard Marine Antennas

Performance Benefits

Key Benefits

- Protects connection from water ingress
- Resists mechanical stress
- Flexible for vibration dampening
- Enhanced grip design
