

Marine Battery Terminal Set with Wing Nuts and Washers

This set includes a positive (red) and a negative (black) terminal for secure connections to battery posts. Each terminal features a wing nut for easy tightening, along with protective washers to prevent corrosion and ensure optimal conductivity.

Product Overview

Marine Battery Terminal Set

This marine battery terminal set is designed to convert standard battery posts for marine, tubular copper lug, or other specialized electrical applications. Each set includes color-coded terminals for easy polarity identification and integrated wing nuts for tool-free installation and maintenance. The included protective washers help prevent corrosion on battery posts, ensuring optimal conductivity and a secure connection for automotive and marine electrical systems.

Technical Specifications

Included Components

- Positive Terminal
- Negative Terminal
- Wing Nuts
- Protective Washers

Terminal Type	Clamp type with wing nut
Color Coding	Red (Positive), Black (Negative)

Applications

Common Applications

Marine • Automotive • Tubular Copper Lugs
