

Marine Bronze Angle Hose Valve

This marine bronze angle hose valve is designed for marine applications. Its angled configuration allows for convenient hose connection, making it suitable for controlling fluid flow in marine environments.

Product Overview

Marine-Grade Flow Control

This Marine Bronze Angle Hose Valve is engineered specifically for reliable fluid control in demanding marine environments. Designed with a robust angled configuration, it facilitates convenient hose connections while ensuring consistent performance. The valve adheres to F7334B standards, making it a dependable choice for maritime piping systems requiring corrosion resistance and durability.

Technical Specifications

Materials (DN15-40)

Component	Material
Body	BC6
Bonnet	BC6
Disc	BC6
Stem	C3771BD or BE
Handwheel	FC200

Materials (DN50-65)

Component	Material
Body	BC6
Bonnet	BC6
Disc	BC6
Stem	C3771BD or BE

Standards & Compliance

Compliance	JIS Marine Valve, F7334B
