

Marine Can Water Filter

This marine can water filter is designed for marine applications. Constructed from FC material, this filter effectively removes impurities and contaminants from water systems.

Product Overview

Marine Can Water Filter

This JIS Marine Can Water Filter is a robust filtration solution engineered specifically for marine environments. Constructed with high-grade materials including cast iron and stainless steel, it ensures excellent durability and effective removal of impurities from water systems. Designed to protect critical equipment, this filter provides reliable performance and long-term operational efficiency for various marine applications.

Material Composition

Body Material	FC200
Bonnet Material	FC200
Cover Push Material	FCD400
Strainer Material	SUS304
Gasket Material	NBR

Standards & Compliance

Standard
JIS Marine Valve
