

# Marine Dashboard Gauge and Control System

This marine dashboard features an array of gauges and electronic controls. It is equipped with analog gauges, an electronic display screen, and a multi-lever control system.

## Overview

### Marine Control & Instrumentation System

This comprehensive marine dashboard system integrates essential navigation and engine monitoring tools into a single, cohesive interface. Designed for durability and precision, the unit features high-visibility analog gauges paired with advanced electronic controls. It serves as a centralized command station for throttle management, gear shifting, and real-time vessel monitoring, ensuring reliable operation for yachts and commercial boats.

## Technical Specifications

### Interface Components

- Analog Gauges
- Electronic Display Screen
- Multi-lever Throttle Control
- Gear Shift Levers
- Safety Lanyard
- Control Switches

### Finish & Build

Chrome-finished, Marine-grade, Reflective Face

### Control Mechanism

Multi-lever mechanical and electronic hybrid
