

Marine Diesel Engine 110kW

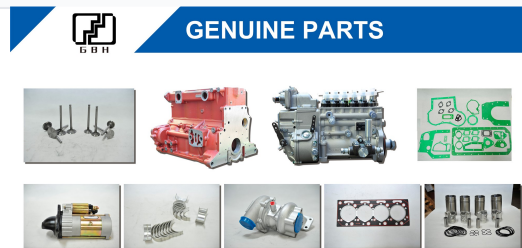

This marine diesel engine features increased water filters for cleaner fuel, protecting the injector and high-pressure pump. This extends the engine's working life.

ADDITIONAL IMAGES

Overview

Includes essential components like pistons, turbochargers, and fuel injection pumps for long-term maintenance.

High-Performance Marine Diesel Engine

Designed for reliability and longevity, this marine diesel engine features advanced fuel filtration to protect critical components like injectors and high-pressure pumps. Its compact design facilitates easier installation and transportation, while specialized sealing techniques minimize fuel consumption. Engineered for demanding environments, it offers high fatigue strength and a robust overhaul interval exceeding 10,000 hours.

Technical Specifications

PACKING

Secure, moisture-protected packaging designed for safe international transport.

Engine Performance Data

Model	Cylinders	Aspiration	Displacement (L)	Bore x Stroke (mm)
ZH495C	L4	NA	3.26	95*115
ZH4100C	L4	NA	3.61	100*115
ZH495ZC	L4	TC	3.26	95*115
ZH4100ZC	L4	TC	3.61	100*115
R4105C	L4	NA	4.33	105*125
