

Marine Diesel Engine 90-120kW

This marine diesel engine delivers between 90-120kW of power. It is designed for durability and efficiency in various marine applications.

Overview

Robust Marine Power Solutions

These marine diesel engines are engineered for reliability and performance in demanding maritime environments. With a 5.9-liter displacement, these units are suitable for a wide range of vessels including fishing boats, workboats, and recreational craft. The series offers mechanical simplicity for easier maintenance and dependable operation.

Performance Specifications

Model Performance Data

Model	Rated Power (kW/rpm)	Max Power (kW/rpm)	Air Intake
6BT5.9-M120	90/2200	100/2270	Turbocharge
6BTA5.9-M150	110/2200	120/2270	Turbocharged and intercooled

Engine Displacement	5.9 L
