

Marine Diesel Engine MD250SC

The MD250SC is the lowest rated engine in the supercharged model program. It is highly suitable for medium performance planning craft and has a light duty rating, with a medium duty option available.

Overview

High-Performance Marine Power

The MD250SC is a robust marine diesel engine engineered for reliability and durability in demanding maritime environments. It features an advanced air intake system with integrated crankcase ventilation and a comprehensive warning system for critical operating parameters. Designed for versatility, this engine offers flexible electrical configurations and adjustable mounting to suit a wide range of marine vessel applications.

Electrical Systems

Alternator Voltage	12 V
Alternator Amperage	105 A
Available Options	24V system available

Engine Components

Governor Control	Mechanical governor
Oil Lubrication System	Remote twin oil filters with closed crankcase ventilation
Air Intake System	Air filter with integrated crankcase ventilation

Installation & Safety

Safety Alarms

- Water temperature alarm
- Oil pressure alarm

Mounting System	Adjustable mounts
