

Marine Diesel Engine Oil CF-4 15W/40

This medium alkaline diesel engine oil is specially developed for marine applications. It contains additives to reduce piston carbon deposition and wear, suitable for high-power, turbocharged medium-speed diesel engines.

Product Overview

Marine Diesel Engine Oil

Specially developed for marine applications, this medium alkaline diesel engine oil is formulated with advanced alkaline cleaning additives and antioxidants. It effectively reduces piston carbon deposition while protecting piston rings and cylinder liners from wear. Engineered to meet the API CF-4 quality standard, it provides reliable performance for high-power, turbocharged medium-speed diesel engines operating under demanding marine and industrial conditions.

Technical Specifications

API Quality Classification

CF-4

Packaging Sizes

- 16L
- 18L

Available Viscosity Grades

15W/40, 20W/50

Performance Features

Performance Highlights

- Reduces piston carbon deposition
- Protects piston rings and cylinder liners
- High viscosity index for all-season use
- Low volatility to reduce oil consumption
- Maintains stable oil pressure

Application

Recommended Applications

Marine vessels, Fishing boats, Freighters, Industrial power plants, Railway diesel engines

Fuel Compatibility

Suitable for engines burning low sulfur fuel oil with sulfur content less than 2%
