

# Marine Diesel Generator Set

This marine diesel generator set delivers reliable performance, environmental protection, and energy saving. It is designed for easy maintenance and continuous long operation, suitable as E-power, main power, and harbor power.

## ADDITIONAL IMAGES

## Product Overview

### Robust Marine Power Solution

This high-performance marine diesel generator set is engineered for superior reliability and fuel efficiency in demanding maritime environments. Designed for versatile use, it serves effectively as a main, emergency, or harbor power source for various vessel types including tugboats, freighters, and dredging ships. The unit features an advanced control system for precise monitoring of critical engine and electrical parameters.

## Technical Features

### Engine Performance Benefits

- High combustion efficiency
- Superior fuel economy
- Strong driving force
- Easy maintenance
- Long continuous operation capability

### Compatible Alternator Brands

SUNVIM, STAMFORD, LEORY SOMER, MARATHON

## Certifications

### Available Marine Certifications

CCS • ABS • BV • DNV • LRS

### Emissions Compliance

Meets IMO NOx standards (EIAPP)

## Deployment

### Suitable Marine Applications

- Draining water ships
- Tugboats
- Fishnet ships
- Freighters
- Digging ships

### Available Housing Configurations

Open type, Soundproof (silent) type
