

Marine Double Suction Centrifugal Pump

This marine centrifugal pump is designed for high-volume fluid transfer applications. It features a horizontally split casing for easy maintenance and a double suction impeller for high efficiency.

Product Overview

CWS Series Centrifugal Pump

The CWS series is a single-stage, double suction, mid-open horizontal centrifugal pump engineered for reliable fluid transfer. Designed for versatility, it handles fresh water and chemically similar liquids, with options for corrosive-resistant coatings. This robust unit is widely utilized in marine applications, industrial water supply, and irrigation systems.

Technical Specifications

Maximum Liquid Temperature	80 °C
Rotation Direction	Anticlockwise (viewed from motor)
Common Applications	Marine, Factory Water Supply, Mining, Power Stations, Flood Control, Irrigation

Performance Data

Main Technical Parameters

Model	Power (kW)	Capacity (m ³ /h)	Head (m)
150 CWS-8.5	25.2	160	50
150 CWS-8.5 A	17.5	140	40
150 CWS-6	39.7	160	55
200 CWS-13	33.9	280	45
200 CWS-9	50.2	280	75
