

Marine Engine Nozzle and Cap Set

This set contains a replacement nozzle and cap for marine engines. These parts ensure the optimal performance of the engine.

Product Overview

Marine Engine Nozzle and Cap Set

This Marine Engine Nozzle and Cap Set is designed for precision performance in marine engine applications. The set includes two distinct nozzle components, each engineered for specific flow characteristics and durability. These parts are essential for maintaining optimal fuel injection efficiency and engine reliability in demanding maritime environments.

Technical Specifications

Set Composition

- Threaded top nozzle
- Tapered cylindrical nozzle
- Protective nozzle caps

Packaging

Individually wrapped • Clear plastic packaging

Part Number

100-1336 IB/3
