

Marine Fairlead Chock for Rope Guidance

This marine fairlead chock is designed to guide ropes and cables on a vessel. It is constructed from durable metal with a smooth, curved surface to minimize friction.

Product Overview

Marine Fairlead Chock

This Marine Fairlead Chock is a robust piece of hardware designed for efficient rope guidance on vessels. Constructed from durable metal, it features a smooth, curved surface to minimize friction and wear on lines. The design incorporates two separate chocks, allowing for the management of multiple lines simultaneously, with a sturdy base that ensures secure mounting in demanding maritime conditions.
