

Marine Fluid Transfer Pump

This pump is designed for marine applications. It facilitates the transfer of fluids in industrial settings.

Overview

Industrial Marine Fluid Transfer Solutions

This selection of marine-grade fluid transfer pumps offers a variety of configurations suitable for cooling, fuel oil transfer, fire fighting, and ballast operations. These units are available in both used and reconditioned states, providing versatile solutions for industrial marine maintenance and fleet support. Built with durable iron or brass casings, these pumps are engineered to meet specific flow and head requirements for demanding shipboard environments.

Available Units

Inventory Details

Model	Capacity (m3/h)	Head (m)	Power (kW)	Status
ESC-125MC	88	30	15	Used
NHD-2.5M	8.5	3	N/A	Used
NHG-1	1	4.5-7	0.75	Used
NHG-2.5	3.5	30	1.5	Used
NHGHS-7.5	7.5	11	5.5	Reconditioned
VSN-150B	90-180	30-80	45	Used/Recond

Technical Specifications

Construction Materials

Iron Casing • Brass Casing

Electrical Standards

440V, 60Hz
