

Marine Gate Valve

This marine gate valve is designed for installation in marine environments. It controls the flow of liquids or gases within a system.

Product Overview

JIS Marine Gate Valve

This high-performance marine gate valve is engineered for durability and reliability in demanding maritime environments. Constructed from robust cast steel, it features precision-machined internal components designed to meet strict JIS marine standards. This valve ensures secure flow control and long-term operational integrity for essential marine piping systems.

Technical Specifications

Material Composition

Component	Material
Body	SC450
Bonnet	SC450
Disc	SC450
Valve Seat	BC6/SCS2
Stem	C3771BD or BE/SUS403
Packing Gland	BC6
Handwheel	FC200
Gasket	Non-asbestos

Primary Material

Cast Steel

Valve Type

Marine Gate Valve

Standards & Compliance

Standards
