

Marine Gooseneck Ventilator

This ventilator conforms to CB/T296 standards. It offers easy operation, widespread use, and enhanced weathertightness for exposed natural ventilation on diverse ship types.

Overview

Marine Gooseneck Ventilator

The Marine Gooseneck Ventilator is designed for exposed natural ventilation on all types of ships. It features a robust, weathertight construction that effectively prevents water ingress while maintaining consistent air circulation. Built to comply with CB/T296 standards, this unit is engineered for reliability in harsh marine environments.
