

Marine GPS Chartplotter with VHF Radio

This marine device combines GPS chartplotting with VHF radio functionality. It features a 12-inch direct sunlight viewable display, Class D VHF, 30W PA, FOG signaling, and C-Map NT or MAX cartography capability.

Overview

Professional Marine Navigation System

This advanced marine navigation system integrates a large, 12-inch direct sunlight-viewable display with a commercial-grade Class D VHF radio. Designed for reliability and ease of use, it supports detailed C-Map NT or MAX cartography for precise positioning. The system also offers versatile connectivity, including dual RAM+ microphone ports and video inputs for external cameras or media players.
