Product Overview

Marine Guide Roller

This marine guide roller is engineered to facilitate smooth and controlled movement of ropes and cables in demanding maritime environments. Conforming to CB 58-83 and JIS F2014-87 standards, it is constructed from durable steel to minimize friction and wear. It is a reliable component suitable for shipbuilding, ocean transportation, harbor operations, and defense applications.

Standards Compliance

CB 58-83, JIS F2014-87
