

Marine High-Pressure Air Compressor

This horizontal high-pressure air compressor is designed for marine applications. It delivers compressed air at a capacity of 0.27~0.43M³/min and a rated pressure of 5.9~19.6Mpa.

Product Overview

Marine High-Pressure Air Compressor

This high-pressure air compressor is engineered specifically for demanding marine environments, providing reliable compressed air for essential onboard systems and operations. Designed with robust construction, it supports various configurations including water-cooled, air-cooled, diesel-driven, and electric-driven models. This versatile equipment is suitable for use in shipyards, offshore platforms, and diverse marine facilities.

Product Features

Cooling System Options	Water-cooled, Air-filled
Drive Configuration	Diesel driven, Electric driven, Piston type

Performance Data

Technical Specifications by Model

Type	Displacement (m ³ /min)	Pressure (Mpa)	Speed (r/min)	Power (kW)	Weight (kg)
1-0	2.7	14.7	7.5	10	300
1-7.5	1000	10	0	0	210
Cz - 0.42	14.7	1460	11	15	330
CZ - 0.42/150	0	1500	11	15	270
CZ - 0.43	6	1460	11	15	330
CZ - 0.43/60	0	1500	11	15	270
CZ - 0.41	19.6	1460	11	15	350
