

Marine Horizontal Self-Priming Centrifugal Pump

This horizontal centrifugal pump features a self-priming function. It is designed for easy installation and is suitable for draining water on ships.

Overview

Marine Horizontal Self-Priming Centrifugal Pump

The CWZ series horizontal centrifugal self-priming pump is engineered for reliable performance in demanding marine environments. Designed for ease of installation and operation, this pump features high self-priming capabilities and a robust horizontal configuration. It is an ideal solution for various shipboard applications, ensuring efficient fluid transfer and drainage.

Technical Specifications

Maximum Fluid Temperature	80 °C
---------------------------	-------

Applications

Primary Applications	Ballast, Fire Control, Life Water Supply, Bilge Drainage
----------------------	--

Compatibility

Suitable Media

- Sea water
- Fresh water

Design Features

Design Configuration

Horizontal • Self-Priming • Centrifugal
