

# Marine Hydraulic Fixed Boom Crane 5T

This hydraulic crane is designed for use on oil tankers and in ports. It is designed for efficient lifting and material handling on ships and offshore platforms.

## Product Overview

### Marine Hydraulic Fixed Boom Crane

This hydraulic fixed boom crane is engineered specifically for demanding marine environments, including oil tankers and port operations. Designed for efficient material handling, it features a compact structure that ensures reliable performance and flexible rotation. Built to comply with ABS classification society standards, the crane integrates high-quality European-sourced components to guarantee operational precision and durability.

## Technical Specifications

### Safe Working Load (SWL)

**5 t**

Safe Working Load

<b>Boom Length Range</b>	2 - 9 meters
<b>Compliance Standards</b>	ABS Classification Society

## Key Components

### Key Imported Components

- Reducer
- Hydraulic Pump
- Multiway Valve
- Proportional Valve
- Piston Motor
- EL Motor

## Operational Features

### Operational Benefits

Flexible Rotation • Compact Structure • High Efficiency • Reliable Operation
