

Marine Immersion Survival Suit

This one-piece immersion suit is designed for marine safety and survival. Constructed from 5mm thick neoprene, it includes integrated boots, gloves, and a hood for full body protection and features a buoyancy pillow, removing the need for an extra lifejacket.

Product Overview

Marine Immersion Survival Suit

This one-piece immersion suit is engineered for critical marine safety and survival in emergency situations. Constructed from high-performance waterproof and insulated materials, it provides full-body protection against hypothermia. Designed for reliability on ships and offshore platforms, the suit ensures essential protection when every second counts.
