

Marine Immersion Survival Suit

This marine immersion suit is constructed from 5mm thick neoprene. It incorporates a buoyancy pillow, removing the need for an extra lifejacket.

Product Overview

Marine Immersion Survival Suit

This high-visibility immersion suit is engineered for critical survival in harsh marine environments. Designed for rapid deployment on ships and offshore platforms, it provides essential thermal protection and buoyancy during emergency water situations. Its durable construction, combined with integrated features like gloves and a face seal, ensures reliability and safety when every second counts.

Key Features

Design Elements

- Integrated gloves
- Face seal for water tightness
- Reflective tape for low-light visibility
- Quick donning and doffing design

Safety Features

Thermal Protection, Buoyancy Aid, Waterproof, High-Visibility

Applications

Suitable Environments

Merchant Vessels • Offshore Platforms • Marine Emergency Response
